DETAILED ACTION

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Uchida (9-168256).

Uchida discloses in fig 3. A brush holder for a dynamo-electric machine, wherein a spring and a brush are set in a brush holder base (1), and a terminal plate (4) and a pigtail (3) are connected in an area within 90 degrees from an introducing portion of the pigtail in the brush towards and outside of the brush holder.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-20 is rejected under 35 U.S.C. 103(a) as being of Uchida JP (409168256A) in view of Takeuchi (5810,111). Uchida discloses a brush holder describe in the above paragraph wherein the terminal and the pigtail are connected in an area around a sliding axis of the brush within the width of the brush and wherein the pigtail is introduce from the brush in a direction towards a motor shaft and a column is extending from the terminal plate to connect with the pigtail. Uchida does not disclose a motor for electric power steering.

Takeuchi discloses in fig.1 a motor for a power steering rotatable in both directions. Therefore, it would have been obvious to one having ordinary skill in the art to employ the brush holder of Uchida with the power steering device of Takeuchi for the purpose of generating less electromagnetic noise and high reliability.

Response to Arguments

In response to the arguments that Uchida Yasuji fail to the pigtail and terminal plate connected in an area of 90degrees is noted. However, fig.3 does show the pigtail connected in an area of 90degrees. A line is drawn to indicate the area. The claim is also broad.

In response to the arguments that Takeuchi reference fails to show an electric power steering comprising the brush holder having a pigtail connected in a 90 degree area is noted. However, the applicant fails to show any structural for the power steering and the claim is very broad.

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992).

Conclusion

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
